

Tar Sands Death Hex

Seventy-one years

Stewing northern Alberta,

Oily subsidised trillions,

Sticky sickness

Athabasca to Mackenzie Rivers

Cramm'd carcinogens,

Nauseated North Pole!

Climate HELLFIRES
Suffocating smoke,
Seventeen abnormal
Centigrade above,
Abracadabra Alberta:
Hideous heat
Tinderbox timber
Forest floor flaming
Ferocious fiery future,
Agonising Age!

Twenty twenty-three,
Ominous orange
Northeastern British Columbia
Climate fires raging,
Mortal May
Sinister spring,
Hoy!
Scorching summer.

Never too late
Valiant Climate Gen,
Antidote action
Exhilarating backlash
Spirited uprising,
Vive la révolution!
